# Executive Summary

Accurate, consistent and timely information is necessary to make informed decisions about the performance of New Jersey's school system. The *Staff Course Submission Handbook* was developed to assist school districts in providing education information to the New Jersey Department of Education (NJDOE) in a standardized format to comply with state and federal requirements. For education information to be used effectively, it needs to be identified and captured as a fundamental *data element* or a specific bit of data that can be defined and measured. This *Staff Course Submission Handbook (Handbook)* provides the definition and syntax for these data elements. The standards outlined in the *Handbook* will help produce a consistent body of information upon which all stakeholders can draw.

New Jersey Standards Measurement and Resource for Teaching (NJ SMART) was developed for three primary reasons. First, New Jersey's public education system must become more evidence-based where progress toward instructional goals are measured, and where the effectiveness and efficiency of educational programs are monitored. To achieve this goal, education data must be collected, managed and reported in a fashion that is more useful, accurate, consistent and timely. Second, major regulatory changes, such as the federal *No Child Left Behind Act* (NCLB) and the *Individuals with Disabilities Education Act* (IDEA), are compelling Local Education Agencies (LEAs) and State Education Agencies (SEAs) to collect greater quantities of data to meet increasingly intensive reporting requirements. The NJDOE hopes to ease this burden over time by maintaining information in a more powerful and flexible way. Third, the NJDOE is committed to becoming more service-oriented to LEAs and the public. By providing better information to LEAs and other stakeholders, and by simplifying the burdensome data reports to the state, the NJDOE hopes to increase administrative efficiency through the use of technology.

# Data Elements and Definitions

This *Staff Course Submission Handbook* includes data elements that are currently collected and maintained by schools, districts, and the NJDOE. Not all data elements are relevant to each staff member. It is important to understand how each definition is implemented. In those situations where the implementation of a definition is not clear, it should be reported to NJ SMART so that a collaborative resolution can be reached.

The following information is provided for each data element in the *Staff Course Submission Handbook*:

Name of Data Element	The data element name used within the NJ SMART system.
NJDOE Number	The numerical identification of the data element.
Definition	A brief description of the data element.
Functional, Policy or Legal Description	The rationale for collecting the data element, and how the data element will be used. Other policy and legal implications for its collection.
Required Element?	Indication of whether the data element is required for file submission.
Type	Data element type such as Alpha, Numeric, Alphanumeric, or Date indicates how the field should be treated in order to meet formatting requirements.
Min Length	The minimum number of characters permitted.
Max Length	The maximum number of characters permitted.
Range of Values	The value options of each data element, if applicable.
Validation Rules	Requirement for how each data element must be arranged/reported.
Additional Notes	Additional relevant notes about the data element, including specifics on data validation to occur with respect to each data element.

# Privacy and Security

NJDOE takes privacy and security concerns extremely seriously. To ensure confidentiality of student and staff records, NJ SMART is designed with the following features: First, an audit trail of all logins, changes and logouts are recorded for all registered and authorized users. The audit trail allows for early notification of potential security breaches. It also encourages legal and appropriate use of student and staff information since all activities on NJ SMART are monitored. Persons who illegally access or download information will be prosecuted to the fullest extent of the law. Second, information in NJ SMART is segmented or compartmentalized with security rights set up by the district so that only registered and authorized users have access to information where they have a legitimate educational interest.
